

VAISHNAV A

Mobile Application Developer | Flutter, Dart, GetX, Android, iOS | REST APIs, Firebase, Django

vaishnavpvtt@gmail.com | +91-974-451-3904 | [linkedin.com/in/vaishnav007](https://www.linkedin.com/in/vaishnav007) | Calicut, Kerala, India | github.com/Yyshnav | Open to Relocation: Dubai, UAE

SUMMARY

Software Engineer with 2.5+ years of experience building and shipping production mobile and web applications, including cross-platform Flutter apps for Android and iOS using GetX state management, published-ready builds, OTP-based authentication, and REST API integration with Django and Firebase backends. Strong foundation in data structures, OOP, MVVM/MVC architecture, and Agile/Scrum delivery. Experienced across the full mobile app development lifecycle — UI/UX implementation, API integration, state management, performance optimization, testing, and deployment to the Google Play Store and Apple App Store.

KEY SKILLS

Mobile Development: Flutter, Dart, GetX, Provider, BLoC, Cross-Platform Development, Android, iOS, Material Design, Responsive UI, App Store & Play Store Deployment, Push Notifications, OTP Authentication

Web & Frontend: React.js, JavaScript (ES6+), HTML5, CSS3, Redux, Context API, React Hooks, Responsive Design, Cross-Browser Compatibility, Accessibility (WCAG)

Backend & APIs: RESTful API Design & Integration, Django, Django REST Framework, Python, Firebase (Authentication, Firestore, Cloud Storage, Cloud Messaging), SQL, NoSQL, Postman

Core Engineering: Data Structures & Algorithms, Object-Oriented Programming (OOP), Design Patterns, MVVM, SDLC, Agile/Scrum, Unit Testing, Debugging, Code Reviews, CI/CD Basics, Git & GitHub

Additional: Machine Learning Fundamentals (data preprocessing, scikit-learn), Google Maps API, Payment Gateway Integration, Performance Optimization

EXPERIENCE

Software Engineer — Trycode Innovations Oct 2024 – Present | Calicut, Kerala

Technology and IT solutions company

- Built the Al Rawabi food delivery mobile app end-to-end in Flutter with GetX for state management and a Django REST backend — OTP-based authentication, searchable home feed, product detail pages, and full cart flow, built for Android and iOS.
- Shipped 15+ production features across 3 React.js/Flutter applications in 2-week Agile/Scrum sprints, partnering with a cross-functional team of 5–6 engineers and designers.
- Accelerated front-end load time by 35% and cut new-feature build time by ~20% by architecting code-splitting, lazy loading, memoization, and a shared reusable component library.
- Engineered 10+ RESTful API endpoints integrated with Firebase for real-time sync, authentication, and cloud storage, sustaining 1,000+ active users with near-zero downtime.
- Slashed production bugs by ~25% through rigorous code reviews and unit testing; built a Python/scikit-learn proof-of-concept recommendation feature evaluated by senior engineers.

Software Engineer Intern — Nexus Technologies Mar 2024 – Sep 2024 | Calicut, Kerala

Technology firm specializing in web and mobile solutions

- Built and maintained 2+ responsive web applications in React.js and JavaScript, standardizing UI behavior across screen sizes via reusable component patterns.
- Automated data sync and authentication flows by integrating RESTful APIs with Firebase, cutting manual data-entry steps by ~30%.
- Converted UI/UX wireframes into responsive, accessible front-end interfaces over a 6-month internship, supporting 2 product launches and driving a ~15% reduction in post-release issues.

PROJECTS

Code samples: github.com/Yyshnav

- Al Rawabi Food Delivery App (Flutter, GetX, Django, Android & iOS) — Cross-platform food delivery app with OTP authentication, searchable home feed, spotlight offers, product detail pages, and full cart flow, built and delivered end-to-end.
- Inco Web Application — Reward & point redemption platform built with React.js and Firebase (real-time data, authentication).
- Rawabi Delivery-Partner Web App — Customer-facing website and delivery-partner web app with Google Maps and Firebase integration.
- Mobile App Prototype (Flutter) — Cross-platform mobile UI built with Flutter/Dart, consuming REST APIs and Firebase for authentication.

EDUCATION

Master of Computer Applications — APJ Abdul Kalam Technical University

2022 – 2024 | *Calicut, Kerala*

Bachelor of Computer Science — Calicut University

2018 – 2021 | *Calicut, Kerala*

CERTIFICATIONS

Software Engineering Internship — Nexus Technologies (2024) | Cloud Computing — NPTEL, IIT Kharagpur (2021) | Web Development Essential Training — LinkedIn Learning (2022)

SOFT SKILLS & LANGUAGES

Problem Solving & Analytical Thinking | Team Collaboration & Adaptability | Stakeholder & Project Management | Time Management & Attention to Detail

Languages: English (Fluent), Malayalam (Fluent)
